DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Stiles et al. (US 6,842,737).

Regarding claims 1-3, 10-12, Stiles teaches automatically broadcasting to an information terminal for a given person pre-registered advertising information or reference information in connection with dates and times and/or places appropriate to the an itinerary (see abstract, col. 1 line 27 to col. 2 line 22, col. 3 lines 25-39, col. 7 line 29 to col. 8 line 53). Stiles teaches providing travel-plan schedules to third parties and accepting from the third part relevant information and broadcasting at predetermined timings the relevant information (see col. 7 line 10 to col. 8 line 53, col. 9 lines 30 to col. 10 line 25 and fig 18).

Art Unit: 3622

Regarding claims 4-9, Stiles teaches predetermined personal information stored correlating with the communication addresses wherein the addresses are changed according to travel-plan schedule wherein the third part is billed according to broadcast count, etc (see col. 2 lines 4-22, col. 8 line 14 to col. 9 line 28, col. 9 line 37 to col. 10 line 65).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Knockeart et al. (US 6,622,083) teaches portable driver information device.

Barton (US 6,442,479) teaches location sensitive database.

Morita (US 6,119,095) teaches an itinerary preparing system.

DeLorme et al. (US 5,948,040) teaches travel reservation information and planning system.
